The Department of Microbiology at Harvard Medical School (http://mbib.med.harvard.edu) invites applications for tenure-track positions at the rank of Assistant or Associate Professor. We seek outstanding scientists performing research in any area of microbiology to join our soon-to-be independent Microbiology department.

The positions offer outstanding scholarly and scientific resources in a collegial and collaborative environment. There are exceptionally strong ties to related departments throughout Harvard University, the Harvard affiliated teaching hospitals, and the Boston community. The positions provide the opportunity to join a vibrant community of microbiologists at Harvard University interested in molecular and quantitative approaches to fundamental microbiology, and the development of countermeasures against bacterial and viral infections, including antimicrobials and vaccines.

The successful candidate(s) will become members of the Biological and Biomedical Sciences Program (http://www.hms.harvard.edu/dms/bbs/), and, if appropriate, the Program in Virology; both are campus wide programs with strong focuses on graduate education. The positions also offer the opportunity to teach exceptional graduate and medical students with strong interests in microbiology and medical sciences.

Candidates with a Ph.D., M.D., M.D./Ph.D., or an equivalent doctoral degree and a strong interest in microbiology should submit a cover letter, C.V. (including a full bibliography), a concise 2-page summary of research accomplishments, and a 2-page summary of future research interests through the HMS user portal listed below. Applicants should arrange for three letters of recommendation from reviewers who will receive separate instructions via the portal.

Applications received by October 15 will be reviewed by the search committee. A shortlist of candidates will be invited to present their research as part of a symposium to be held on December 13, 2018 followed by a day for individual meetings with current faculty on December 14, 2018.
